PUBLICATION DESIGN SYSTEM

One visual language, many kinds of document

Reusable page layouts and components for white papers, reports, briefs, case studies, playbooks and proposals

FOUNDATIONS

Editorial, clear and recognisably Patchworks

The system carries the website's approved identity into a more disciplined print environment.

Instrument Serif creates a distinctive editorial voice. Source Sans 3 keeps detailed material calm, compact and easy to scan.

Paper, ink and restrained linework provide the base. Orange is used to locate attention, identify sequence and mark decisions. It should not become a decorative field competing with the content.

Hierarchy before decoration

- One clear argument or purpose per page.
- Short eyebrows orient the reader without repeating the title.
- Body text remains within a controlled measure.
- Every component has a defined role and spacing rhythm.

SYSTEM RULE

Content should determine the component, never the other way around.

A publication can omit any component it does not need. Consistency comes from using the selected components faithfully.

QUANTITATIVE COMPONENTS

Statistics with context

Numbers are useful only when the reader can understand what they mean and where they came from.

A4	6	13	0
Fixed page canvas	**Page layouts**	**Content blocks**	**Accepted overflows**
210 x 297 mm	Cover through closing	Narrative, data and evidence	Rendering fails closed

A value, label and short note form a complete statistic. If a number is externally sourced, the publication should carry a human-readable reference nearby or on a dedicated sources page.

ILLUSTRATIVE DATA

This specimen describes the system itself.

Its numbers are implementation properties, not claims about a market, client or outcome.

STRUCTURED NARRATIVE

Use the same system at different levels of detail

Columns support comparison and sequence without forcing every document into a slide-like format.

Short-form documents

A brief or point of view can use a cover, two or three content pages and a closing page. The typography and chrome stay consistent without padding the argument.

BEST FOR

Decision briefs and concise perspectives

Use when the reader needs a focused argument, recommendation or course of action.

Long-form documents

01 **Orient**

Establish purpose, audience and the question being addressed.

02 **Develop**

Build the argument with narrative, evidence, tables and examples.

03 **Resolve**

State implications, decisions, recommendations or next actions.

04 **Evidence**

Retain sources, assumptions and unresolved points in a usable form.

COMPARISON COMPONENTS

Tables remain editorial rather than spreadsheet-like

Compact typography, strong headings and alternating rows support dense material without losing the visual system.

DOCUMENT	PRIMARY JOB	TYPICAL BUILDING BLOCKS
White paper	Develop a sourced argument	Narrative, evidence, references, implications
Proposal	Define an engagement and decision	Context, approach, scope, team, commercials
Report	Present findings and consequences	Executive summary, analysis, findings, actions
Brief	Enable a focused decision	Question, evidence, options, recommendation
Case study	Show work and outcomes credibly	Situation, intervention, evidence, lessons
Playbook	Guide repeatable action	Principles, sequence, roles, controls, tools

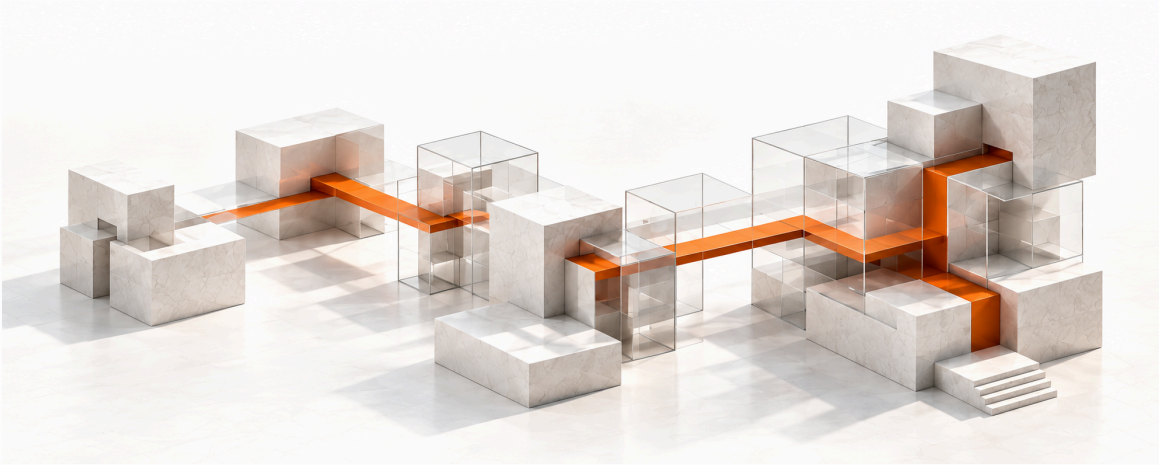

The system is shared; the content architecture changes with the reader's job.

Long tables should be split deliberately across pages. The renderer will reject a table that exceeds the printable region rather than silently reducing its type size.

IMAGE TREATMENT

Imagery carries meaning, not atmosphere alone

Approved editorial images can create pace and clarify systems when their relationship to the argument is explicit.

Existing Patchworks editorial master used to validate image embedding, cropping and caption treatment.

The default treatment uses the full available width and a controlled maximum height. The source remains embedded in the generated document, so the PDF does not depend on a network request.

SOURCES AND QUOTATIONS

Evidence should remain readable after delivery

The publication must never expose internal tool tokens or depend on a hidden research trail.

A polished page cannot rescue an unsupported claim. The design system should make evidence easier to inspect.

Patchworks publication principle

Reference treatment

01 Patchworks AI website

02 Patchworks Lowercase Continuum logo pack and manifest

03 Publication-system brand tokens and content model

FINAL CHECK

Confirm the destination, not only the build.

Visual inspection, text extraction and embedded-font checks are all required before a publication is described as complete.

patchworks ai

PATCHWORKS AI PUBLICATION SYSTEM

Consistent by design. Flexible by composition.

A controlled system for producing clear, credible and recognisably Patchworks publications across different audiences and document types.
